

Environmental Product Declaration

THE INTERNATIONAL EPD® SYSTEM

In accordance with ISO 14025:2006 and EN 15804:2012+A2:2019/AC:2021 for:

EPD of multiple products, based on Representative-Case results

Nichiha EX series Fibre Cement Panels Manufactured Narashino Plant

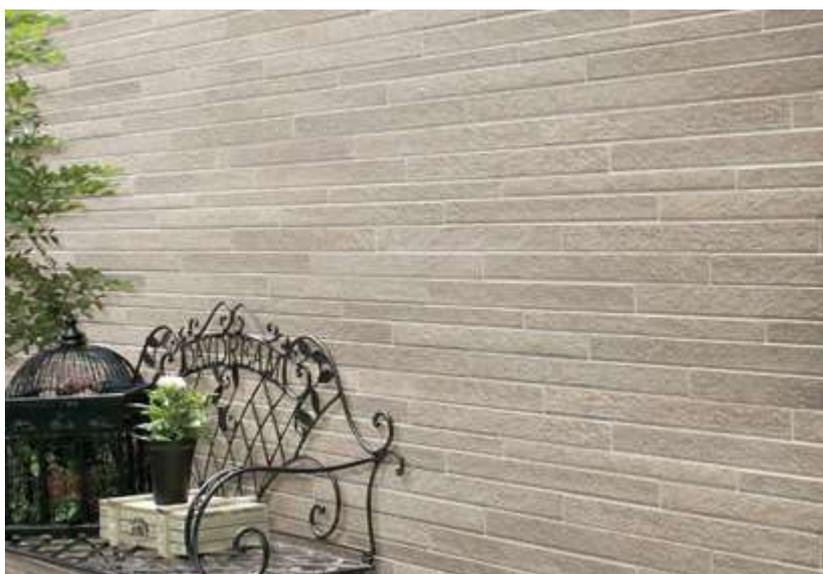

from

Nichiha Corporation

Programme:	The International EPD® System, www.environdec.com
Programme operator:	EPD International AB
EPD registration number:	EPD-IES-0021637
Publication date:	2025-06-01
Valid until:	2030-05-31

An EPD should provide current information and may be updated if conditions change. The stated validity is therefore subject to the continued registration and publication at www.environdec.com

General information

Programme information

Programme:	The International EPD [®] System
Address:	EPD International AB Box 210 60 SE-100 31 Stockholm Sweden
Website:	www.environdec.com
E-mail:	info@environdec.com

Accountabilities for PCR, LCA and independent, third-party verification
Product Category Rules (PCR) CR 2019:14.
CEN standard EN 15804 serves as the Core Product Category Rules (PCR)
PCR review was conducted by: <i>The Technical Committee of the International EPD System. See www.environdec.com for a list of members. Review chair: Claudia A. Peña, University of Concepción, Chile. The review panel may be contacted via the Secretariat www.environdec.com/contact." on the front page of the EPD.</i>
Product Category Rules (PCR): Construction products(EN 15804:A2). Version 1.3.4
Life Cycle Assessment (LCA)
LCA accountability: <i>Hidehito Hiramatsu, Nichiha Corporation</i>
Third-party verification
Independent third-party verification of the declaration and data, according to ISO 14025:2006, via: <input checked="" type="checkbox"/> EPD verification by individual verifier Third-party verifier: <i>Mamoru Yanagisawa, EPA</i>  Approved by: The International EPD [®] System
Procedure for follow-up of data during EPD validity involves third party verifier: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

The EPD owner has the sole ownership, liability, and responsibility for the EPD.

EPDs within the same product category but registered in different EPD programmes, or not compliant with EN 15804, may not be comparable. For two EPDs to be comparable, they must be based on the same PCR (including the same version number) or be based on fully-aligned PCRs or versions of PCRs; cover products with identical functions, technical performances and use (e.g. identical declared/functional units); have equivalent system boundaries and descriptions of data; apply equivalent data quality requirements, methods of data collection, and allocation methods; apply identical cut-off rules and impact assessment methods (including the same version of characterisation factors); have equivalent content declarations; and be valid at the time of comparison. For further information about comparability, see EN 15804 and ISO 14025.

Company information

Owner of the EPD:

Nichia Corporation
 2-18-19 Nishiki, Naka-ku, Nagoya, Aichi, Japan

Contact:

Hidehito Hiramatsu
 h-hiramatsu@nichiha.co.jp

Description of the organisation:

Nichiha was founded in 1956 in Japan, operates globally with 13 plants and over 2,900 employees. We offer products, including EX series fibre cement panels, that provide the unique state-of-the-art technology with the limitless design possibilities. Nichiha Matex is a major subsidiary of Nichiha and its Narashino Plant is located in Chiba Prefecture, Japan.

Product-related or management system-related certifications:

JIS Q 9001: 2015, JIS Q 14001:2015

Name and location of production site(s):

Nichiha Matex Narashino Plant
 6-18-1, Higashi-Narashino, Narashino, Chiba, Japan

Product information

Product name: Nichiha EX series 3030 Simple, Designers, Wood, Stone, Tile/Brick

The product codes end in NX, RX

Product identification: JIS A 5422:2019/AMENDMENT 1:2024 Fibre reinforced cement sidings

Product description: Nichiha EX Series panels are fibre cement sheets that are used for exterior and interior wall material. The panels have been pre-finished using a durable multi-layered paint process to simulate a range of textured finishes.

https://www.nichiha.co.jp/global/products/product_lineup/

UN CPC code: 37570

Geographical scope: Product is manufactured in Japan and sold internationally.

LCA information

Functional unit / declared unit:

Declared unit (DC): 1 square meter, 16mm thickness.

This is multiproduct EPD calculated representative case using the product with the highest production volume. The results for 18mm and 21mm thickness could be linearly scaled with conversion factors showed below.

scaled with conversion factors showed below. Thickness(mm)	Conversion Factor
16mm	1
18mm	1.125
21mm	1.313

Reference service life: Not applicable

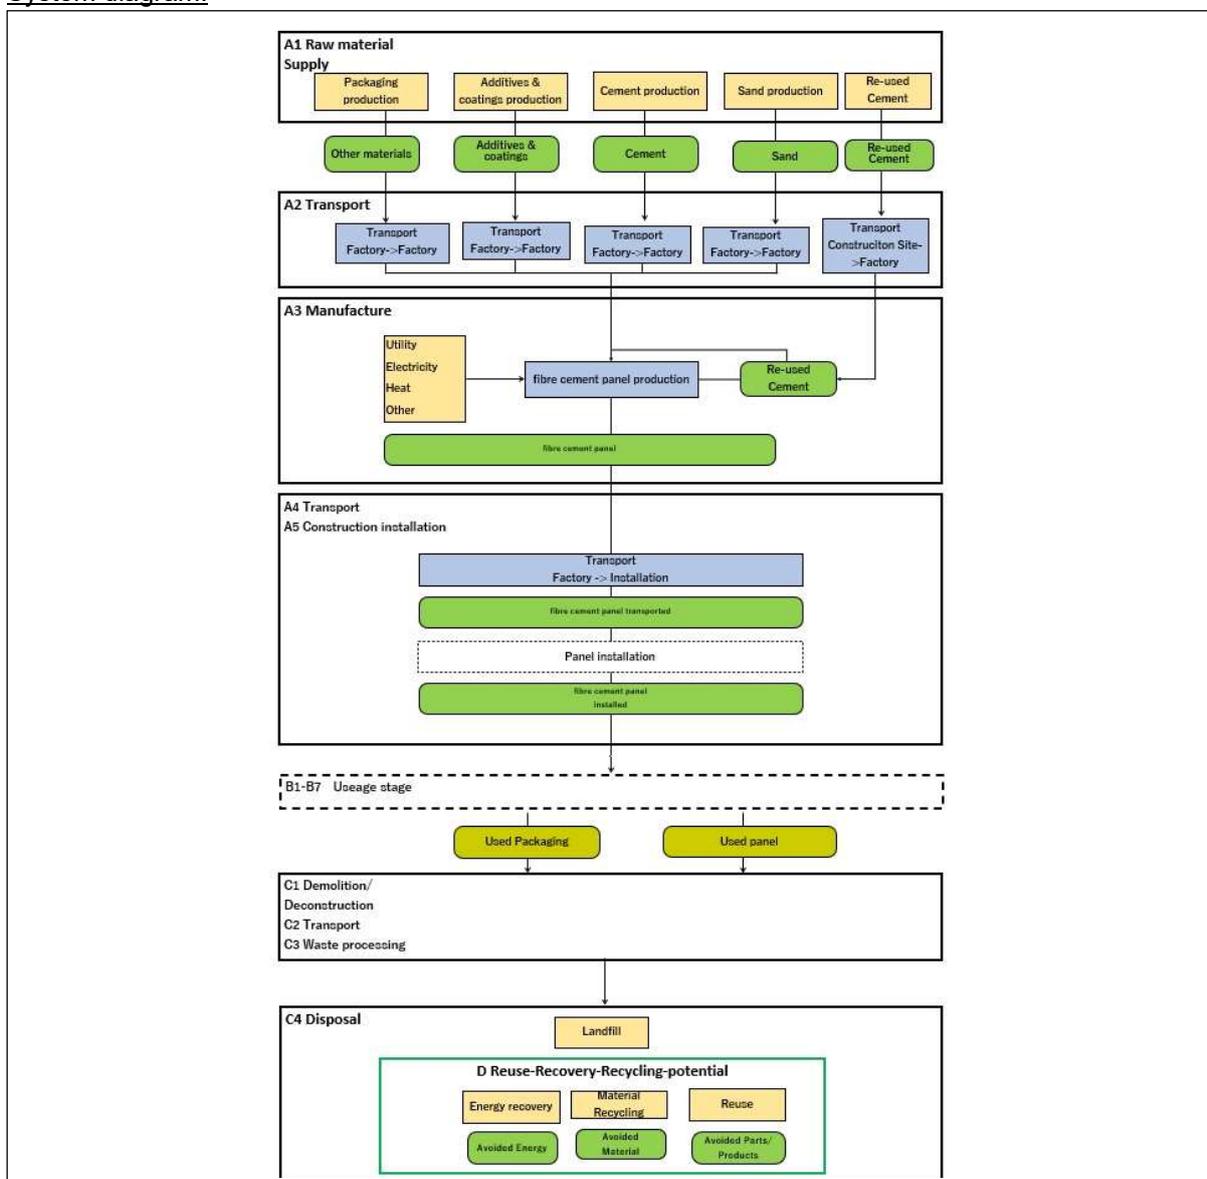

Time representativeness: Manufacturing data is referred to Fy 2023.

Database(s) and LCA software used: Ecoinvent 3.10 and SimaPro 9.6.0.1

Description of system boundaries:

- A1: Includes the raw material supply
- A2: External transport of raw materials
- A3: Electricity and fuels such as natural gas at manufacturing processes
- A4: Transportation from production plant the installation site, packaging weight is considered
- C1: Disassembling of the product during the demolition of the building
- C2: Includes the transport of the dismantled sheets to disposal facility
- C3: Waste processing for recycling or incineration of the product
- C4: Waste processing for landfilling
- D: Considers the benefits of recycling

System diagram:

More information:

<https://www.nichiha.co.jp/global/>

Cut-off rules:

Auxiliary materials which mass contribution on the total mass of raw materials used is less than 0.5%

Distribution scenario:

Data regarding distances between Japan and other countries are sourced from the CERDI database, which provides average distances between respective national ports.

The distance from the country's port to the construction site is set at 73.7 km, based on data from the ecoinvent database for cement tiles.

The End-of-Life scenario:

Recycling/Landfill/Incineration rates were based on the average values for the CFF, as no information was available for the recycling rates, a conservative approach was chosen (recycling rates =0%) as detailed in the PCR

Date quality assessment:

Manufacturing date has been collected from Narashino Plant in Fy 2023.

Climate impacts of the energy sources behind the electricity grids:

0.68kg-CO₂ eq./kWh.

The composition of grid electricity, as documented in ecoinvent 3.10, is as follows: 32.0% coal, 2.1% oil, 44.1% liquefied natural gas (LNG), 3.3% other fossil fuels, 2.0% biomass, 4.6% nuclear, 10.6% hydropower, 0.3% geothermal, and 1.0% wind power.

Modules declared, geographical scope, share of specific data (in GWP-GHG results) and data variation (in GWP-GHG results):

	Product stage			Construction process stage		Use stage							End of life stage				Resource recovery stage
	Raw material supply	Transport	Manufacturing	Transport	Construction installation	Use	Maintenance	Repair	Replacement	Refurbishment	Operational energy use	Operational water use	De-construction demolition	Transport	Waste processing	Disposal	Reuse-Recovery-Recycling-potential
